

Dear Sir / Madam,

I am writing in reference to RM-10808. Of all the submissions concerning if the 5 word per minute morse code should be mandatory for HF privileges. I agree that this requirement should not be mandatory for Amateur Radio Operators who have no desire to use the mode. RM-10808 will keep the code test for those who want to use it and allow other operators to advance their knowledge in other areas like antenna and circuit analysis. Forcing the code for Operators who will never use it is a waste of the individuals time. I ask that you consider RM=10808.
